Hiring Team

Prop Firm Match Global FZCO

Re: Futures Researcher

Dear Hiring Team,

I am applying for the Futures Researcher role because your mission matches how I already work: verify firm data, document sources, and turn complex market rules into clear trader-facing research.

I completed a self-directed portfolio aligned to your three core objectives: (1) six-firm comparison across 30+ criteria, (2) a BLS-verified market brief on the June 2026 NFP miss and gold, and (3) a 50-point PropFirmMatch data accuracy audit documenting 13 discrepancies with recommended corrections.

Full portfolio (Projects 1-3 + spreadsheets):

<https://jimboskipe.github.io/Futures-Researcher-PFM/>

I am an active prop-firm trader with 10,000+ journaled trades, a U.S. Army veteran (MOS 62B-1P), completing a B.S. in Computer Science and Data Management at SNHU, and comfortable with remote ownership and CET overlap hours from Wisconsin.

Thank you for your consideration.

Sincerely,

James Mitchell Doyle
